

Implemented Features:

- GitHub user search and show minimal user details.
- User repositories listing (with infinite scrolling and pull to refresh).
- In case of wrong username a "user not found" notification is shown.
- Open user details in browser by tapping user name.
- On repository Item selection open repository details page in browser.

Development Environment:

Visual Studio 2019 (16.4.0)

Mac OS Catalina (10.15.1)

Xcode (11.2.1)
